PROJECTS

EZPoll
A web app to allow users to create simple polls and share them. Built with React in front end and NodeJs, Express in back end. User can also restrict voters by providing list of eligible voters. The eligible voters get unique id and password to vote.
Contribution : Front end and Design

- ezpoll-india.herokuapp.com

- github.com/AayushMaurya/EZPoll

Protfolio Website
Created a Personal Portfolio Website using HTML, CSS, JS, NodeJS, Express, hbs. This gives links to all my projects and skills and also allows users to contact me.

- personal-portfolio-gaurav.herokuapp.com/

- github.com/gaurav2612gupta/PersonalPortfolio.git

EZ Gaming
It is a fun team project where each member contributed their small web games . This site also has a chat room created using socket.io in which multiple users can interact while playing multiplayer games.
Contribution: Created the main Console and implemented the Chat section.
